

ERC Strategic Framework: Proposal #, PI Name, ERC Name, Lead University Name

ERC Strategic Framework

Instructions

All ERC proposals must include a customized version of this chart to describe the strategic construct of the proposed ERC. Analyze the chart starting from the systems plane, where critical systems barriers and testbeds are defined. These must yield system requirements that generate a body of fundamental and enabling technology research and enabling technology testbeds. The plan must be accompanied by a milestone chart for 10 years of effort with more clarity on the first five years.
